Euroton

Recovery kit

Recovery phrase

If you get locked out of your account, use this phrase to sign in and recover your data.

Password

If you want, write down your password to help you remember.

Why do I need a recovery phrase?

This server keeps your data encrypted. Nobody, including the person who runs the server, can read it without your password or your recovery phrase.

Keep the phrase somewhere safe. If you reset your password without it, anything on your account from before the reset stays locked.

Safe storage tips

- Write down or print a copy of your recovery phrase, and keep it in a safe or wherever you keep important documents.
- For digital storage, use a password manager or storage that doesn't run on this server. You won't be able to reach this server's services if you get locked out.

Need help? Ask the person who runs this server.
